***Election/Restrictions***

Claims 76-105 are generic to the following disclosed patentably distinct species: the star structure polymers according to formula (I).

The species are independent or distinct, and the monomers and functional groups that are encompassed in the claims are so numerous that searching all the limitations of the claims would impose undue burden on the examiner and exhaust the resources at the Patent Office. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, i.e., a single disclosed polymer with specifically identified polyfunctional group and monomers, a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
